Microeconomic Principles 2010-100, TTh 11:00-12:15 pm, CHEM 140
Phil Graves
Content:

Microeconomic principles 2010 introduces you to the "economic way of thinking." The central fact that underlies economics is the fact of "scarcity." By this it is meant that our wants exceed the goods freely available from nature--hence choices must be made among the many things we want. This

analogy: The "ecosystem" of microeconomics is competitive equilibrium, with supply and demand determining prices and quantities exchanged in each of a plethora of individual markets (interacting "forests"). The "trees" that make up each forest are the individual economic agents (households

the end of the syllabus...there are no makeups...do not will only be given in situations in which a student is to be changed according to University policy.

me or to our very competent and helpful advisors in the standards and faculty each have responsibility for me standards may be subject to discipline. Faculty have the guide classroom discussion and to set reasonable limit sensitivity are especially important with respect to incompare to my records. See polices at:

Grading:

test grades as the largest number arising from the following alternative calculated scores:	
it and take it under "test conditions," later comparing your answers with those posted on the web (you will know in this way how you we test booklets hence can immediately know how well you did (this assumes that your bubbled in scantron is consistent with your circled a	
dateare indicated in the brief course topic description below.
