Course Description

This course introduces the theoretical framework for analyzing the economic behavior of individual decision-makers, such as consumers, workers, firms, and managers. The course is divided into six sections. We begin with a basic review of supply and demand in Section 1. We then proceed to Section 2, which covers consumer behavior and market demand

the honor code, so don't do it and don't ask someone to use your clicker if you are going to be absent from class.

Course Requirements

Attendance for two of the first three classes in mandatory or you may be dropped from the class. Your participation and attendance grades will be based on random attendance checks and clicker data throughout the semester and your participation during the class. I allow you to be absent for three before an absence affects your participation grade. There is no need to email to me to let me know you will be absent or why, unless you are very sick and will be out for over a week. Your grade is made of up the percent of classes you are marked present for which attendance is taken. If you miss class, it is the student's responsibility to catch-up on any missed material from other students in the class.

Grading

There will be 8 homework assignments, two mid-term examinations and one final exam. The weighting for these assessments are:

Assignments	10%
Participation/Attendance	10%
Midterm Exam 1	20%
Midterm Exam 2	25%
Final Exam	35%

Assignments

The schedule of when problem sets are due is below. **Problem sets handed in at the beginning of class or earlier are considered on time. Late problem sets (even those that are handed in after the beginning of class) will receive a score of zero.** The two assignments with the lowest scores will be dropped and not count towards your grade. Because of this policy, you do not need to let me know you are not handing a homework in for whatever the reason. I recommend you do all homework as the exams are structured somewhat similarly to homework questions.

Homework solutions will be posted soon after the due date. Students can work on the problem sets in small groups (4 people or less). However, each person *must* submit their own write-ups of their problem sets *and* you must put the names of your group members on your assignment (make sure your name is distinct from the group members, so I know who to give the grade to). Handing in identical homework is not permitted and will result in a zero for all people with identical homework. Homeworks for which any answer is identical to a solution key from past years will receive a grade of 0, even if just one of the questions on the homework was copied.

Each assignment will be graded on a scale from 0 to 3: 0 points for not handing it in, 1 point for poor performance, 2 points for average performance, and 3 points for outstanding performance.
