COURSE DESCRIBTION

This course studies the behavior of individual economic agents and their market interactions. The course is roughly composed of four parts. Part 1 introduces the basics of microeconomic analysis, and serves as a quick review of some basic economic concepts. Part 2 studies consumer behavior and market demand. We will show how a consumer may make optimal choices, how individual demands are formed, and how market demand can be derived. Part 3 discusses the firm's technologies, production functions and production costs. We shall see how firms can make the optimal input choices to minimize production costs. This lays the foundation for the study of behavior of firms under different forms of market structure. Part 4 integrates the previous material into models of prices and outputs. Topics in game theory and business strategies will be covered. Economic efficiency and public policy issues will also be discussed.

REQUIRED TEXTBOOK

Microeconomics, by Besanko and Braeutigam, 4th Edition, Wiley (The 3rd edition also works). It is a highly recommended learning strategy to read relevant chapters in the textbook before each lecture. I will distribute incomplete lecture notes before each class and you have to fill them out during classes.

EXAMS(60%)

There will be 3 exams in total: 2 midterms and a cumulative final exam, all in the format of short answer questions. All exams are held in the regular classroom and the dates are listed below. Each of the midterms counts for 15% of your final grade, and the final counts for 30%.

GRADING

Your grade will be determined as follows:

А

MT1 (15%) + MT2 (15%) + Homework (25%) + Quizzes (15%) + Final (30%) = 100%
