

Course Assignments and Canvas:

All course assignments, problem sets and some lecture notes are posted on Canvas at <http://canvas.colorado.edu>

Please note that four pages of each Adobe Acrobat file can be printed on a single sheet by clicking as: Print > Landscape > Multiple > Custom 2 by 2 .

Attendance at class:

Woody Allen once remarked: "90% of success is just turning up". The best way to learn the material is to attend class. Reading the lecture notes posted on the web is not a good substitute for attendance. Attendance at class is expected and required.

Administrative Drop:

Because attendance is important and is expected, I will drop from the class any student who neither attends two of the first three classes of the term nor gets special permission from me for his/her absence.

Use of clickers:

Clickers will be used near the end of most classes to reinforce the main point of the lecture.

I consider it fraud if a student uses another student's clicker.

You get a green light when your answer is registered. If you get a red light, your clicker is not registering and your score is automatically zero.

Problem Sets:

Problem sets with answers are listed under each topic on the syllabus. The problem sets are an integral part of the course. They are designed to help you use the material and a significant part of the exams will loosely follow their format.

Although the answers to the problem sets are posted, I encourage you to make a real effort to solve the problem before you check the answer.

Paper and contributing to the team in its creation of the paper:

The paper is designed for you to apply the course's material to a topic of interest to you. It will be done as a team of three students.

There have been a few instances in the past when a member of a group does not fully participate in the creation of the paper. If this starts to happen, the members of the group who are participating should *immediately* email me noting that the member of the group is not fully participating in the creation of the paper. I will then summon all group members to my office to discuss. If he/she agrees that he/she is not fully participating, I will give her/him a chance to re-engage with the group and do his/her share. If there is no change in behavior, I will increase the scores of the participating members to reflect the fact that they are doing more work and reduce the score of the non-participating member.

Exams:

Because this is an advanced course, there is only one midterm. The midterm and final will be given as:

| | | |
|----------|----------------------------------|-----------------|
| MIDTERM: | Monday 7 Oct in: TBA | 7:00 - 9:00 pm. |
| FINAL: | Saturday 14 Dec in DUAN G2B47 | 4:30 - 7:00 pm. |

You must bring a blue-book to each exam. You must bring a blue-book to each exam.

Concerning in-class clicker questions. Each correct answer will receive 1 point, and an absence or an incorrect answer will receive zero points. In calculating your total score for all in-class clicker questions, I will sum your scores for all days, omitting your three lowest daily scores.

Concerning the paper. It is important that the paper is handed in on the date due (to be announced). If the paper is not handed in by the date due, your maximum score for the paper will be lowered from 10 to 5 points. If the paper is not handed in by the day of the exam, your score for the paper will be 0.

Classroom courtesy:

Please turn your cell 'phone off prior to the start of class.

I believe that learning is enhanced if there is full concentration by both the instructor and the student. To facilitate this, laptops may only be used in the front two rows of the classroom and usage of laptops in class is restricted to following the course notes.

Accommodations for Disabilities:

If you qualify for accommodations because of a disability, please submit your accommodation letter from Disability Services to me in a timely manner so that your needs can be addressed. Disability Services determines accommodations based on documented disabilities in the academic environment. Information on requesting accommodations is located on the [Disability Services website](#). Contact Disability Services at 303-492-8671 or dsinfo@colorado.edu for further assistance. If you have a temporary medical condition or injury, see [Temporary Medical Conditions](#) under the Students tab on the Disability Services website.

Religious Observance:

Campus policy regarding religious observances requires that faculty make every effort to deal reasonably and fairly with all students who, because of religious obligations, have conflicts with scheduled exams, assignments or required attendance. In this class, please let me know in a timely manner if one of the exam dates falls on a religious holiday you intend to observe and I will arrange for you to take a make-up. See the [campus policy regarding religious observances](#) for full details.

Classroom Behavior:

Students and faculty each have responsibility for maintaining an appropriate

learning environment. Those who fail to adhere to such behavioral standards may be subject to discipline. Professional courtesy and sensitivity are especially important with respect to individuals and topics dealing with race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy. Class rosters are provided to the instructor with the student's legal name. I will gladly honor your request to address you by an alternate name or gender pronoun. Please advise me of this preference early in the semester so that I may make appropriate changes to my records. For more information, see the policies on [classroom behavior](#) and the [Student Code of Conduct](#).

Honor Code:

All students enrolled in a University of Colorado Boulder course are responsible for knowing and adhering to the Honor Code. Violations of the policy may include: plagiarism, cheating

COURSE OUTLINE

| <u>Date</u> | <u>Topic</u> | <u>Chapter</u> |
|-------------|--------------|----------------|
|-------------|--------------|----------------|

1. INTRODUCTION

| | | |
|--------|---------------------------------------------------------------------------------------------------------------------------------------------------|---|
