Office Hours: T 10:50Đ12:30pm & 3:00Đ4:10pm; R10:50Đ12:30pm

Course Description

This course is designed to give you an introduction to the implications of natural resources as economic concepts. It presents theories of efficient utilizationatofral resources and discusses issues related to current practices of use of resources. We will study natural resources used in the economy, the value of natural resources to society, and the allocation of renewable-and non renewable resources. We alsocals issues of sustainability, conservation, and preservation. The course extensively uses graphical analyses and some mathematical incontribution to learning about the methods that economical use to analyze natural resources solutions to these problems.

A much more detailed outline of covered material is posted separately.

Prerequisites

Students must have completed ECOOVT8, 10882010, 2020, 3070 and 3818. I assume that you did not only take the class, but also that you understand and remember the dointenency important that you fulfill the prerequisite fore you take this course, are dill understand the materials in the prerequisite If you have any uncertainty to the take the course, please talk to me ASAIPhe prerequisites must be strictly enforced.

I <u>will</u> use calculus in the course. Materials learned in 3070 will form a **tational** or what we will do in 4535. I will cover the relevant micro theory in my lectures, but cover it more quickly than when it was presented to you in intermediate microeconomic thetais important that you have successfully completed Intermediate Micro Theory. If yarean environmental studies major who has doubts about their knowledge of economics, talk to Ninsoon.

While this is not a microheory course, economics with the theory is not economics. You will need micro theory to understand and explain allocation of natural sources. Some of the theory and terms you will need to know include: the ory of the firm the theory of the consum efficiency when the market quilibrium will and won Ot be efficient arket failure types of market failures,

Policy on Cheating:

If you are found to have violated the honor code (see below), by both the honor code council and myself, you will automatically fail the course!

Electronics in the Classroom

Laptops, tablets, and even phones can actually play a roll and benefit learning in many types of classes. There are many pros and cons of allowing consistent use of these devices during the class period. However, it has become abundantly clear to me that these devices are more of a distraction than a learning aid in most economics classes. In addition, taking notes by hand has actually been shown to be more effective than taking them on a laptop or tablet. Therefore, electronic devices will not be allowed in class (except on specifically designated days). If you use them, I will subtract 1% from your overall grade for each instance without notice. If you are expecting an important call or text, then simply put your phone on vibrate, sit near the door

Learning systems:

- 1. Lecturing: explaining difficult material not easily learned on your own with text, groups, etc.
- 2. Exams: exams should be learning tools as well as assessment tools! We will go over each exam in depthin class. Reviewing exams is one area where as discussion and explanation are most effective. Just reading answers on a key has been shown to be one of the worst ways to learn material. Therefore, exam reviews will be the one area of class where no notes, associated pictures or keys will be posted.
- 3. Group-Led-Discussionswe will cover both classic and more recent relevant articles from scholarly journals. Group

Final Exam Conflicts

Official University Policy states that you have three or more final exams scheduled on the same day, you are entitled to arrange an alternative exam timbédast

Grading Pop Quizzes

Disabilities

If you qualify for accommodations because of a disability, please submit to your professor a letter from Disability Services in a timely manner (for exam accommodations provide your letter at least

A reply from one student to another on the discussion board for one of my colleague's online classes: "If you read the course syllabus you will find the answer to your questions. If you do not understand what you read I recommend you read multiple times. After reading the syllabus if you still have questions come back and I will try to help you as much as possible."
