Course Description & Objectives

This course offers a Ph.D.-level introduction to the field of

7. There will be a final exam based on the articles on the reading list and the material we cover in class. You may consult your notes and assigned readings during the exam, but you should not consult with other people in or outside the class for formulating your responses. It is important that you demonstrate that you are thinking independently of other sources. I will provide discussion questions to prepare you for the types of questions you will see on the final.

Please hand in a hard copy of the assignment cover sheet with the Referee Report, Research Proposal, and Final Exam. It is available on the course website.

The assignments will be weighted as follows:

1. Referee Report: 10%
2. Participation (including 10 summaries): 10%
3. Presentation of an Article on the Syllabus: 10%
4. Presentation of Research Idea: 10%
5. Research Proposal: 30%
6. Presentation of Research Proposal: 10%
7. Final Exam: 20%

Class Policies

There is no excuse for missing an exam unless there is a documented medical or family emergency. If a legitimate emergency arises, notify me as soon as possible. If you foresee any legitimate conflict with the dates of the assignments or exam, please see me at the beginning of the semester or as soon as possible.

If you miss a class, you are responsible for obtaining notes on the material we covered from another classmate. I encourage you to come to my office hours to discuss the material you missed, but not

Lectures and discussions will primarily be drawn from journal articles and working papers. Although there is no required textbook for the course, the textbooks and methods articles listed below may be useful for you to consult for a more thorough presentation of the theory and methods used in the articles we will review.

Useful Books

Preliminary Course Outline

The articles under the topic headings below are required reading for everyone in the class. Some of these papers will be presented by a student (denoted with *), but everyone should read those articles for class discussion as well. Articles under the Background& Further Reading sections may be useful and of interest to you but may not be included in lectures and are thus optional readings unless otherwise noted.

For many of these papers, multiple versions are
