CONTENT

This class is the second of a two-course sequence, and a continuation of ECON 1078. We will cover topics that include derivatives, optimization, and integrals. These tools will help you better understand the mathematical framework on which economic models are based and help prepare you for more advanced economics courses.

GRADING

Your grade will consist of three exams, acumulative nal exam, homework assignments and in-class team assignments will not give any make up exams and will not give early/late exams. Each portion of your grade will be weighted as follows:

Midterm 1:	25%	Friday, February 11		
Midterm 2:	25%	Wednesday, March 16		
Midterm 3:	25%	Friday, April 15		
Final Exam:	30%	Wednesday, May 4 @ 7:30pm		
Homework Assignments: 10%				
Team Assignments:	10%			

IMPORTANT: Since the nal exam is at 7:30pm,you need to let me know, AT THE BEGINNING OF THE SEMESTER, if you have three exams on 5/4 to arrange a di erent time.

To make your total grade add up to 100%, I will drop the lowest of the three midterm scores. In addition, I will drop the lowest of the homework grades and the lowest of the team gradesYour grade on the nal exam will not be dropped under any circumstances.

Homework assignments are due at the beginning of class of the due date. I will not accept late assignments for any reason.
